

LT: How to print text in Java by using a print statement		
Lesson Plan		
5 min Entry slip	Warm Up: 	Share
We do	Walk through starter code: <pre>public class Main{ public static void main(String[]args){ System.out.print("🐱") } }</pre>	<ul style="list-style-type: none"> • Able to add extension • Able to get to pet the cat
You do	Develop code in Java that prints "Hello World" as a print statement	Checking in with students. If need a reteach - can do at board - others can work as I reteach if they get it
Exit	Reflect in padlet: https://fgpa.padlet.org/missmuller/videosense What do you like best about the project you made? What was the hardest part? If you had more time, what would you add or change?	<ul style="list-style-type: none"> - Good struggle? - Reflecting on change
	Accommodations: Paras assist with work - Don't give them the answer - give them hints if they are stuck - such as direction , did they code the correct sprite?
